

PTCC SERIES

Metal Box Fans

PTCC series Metal Box Fans have high airflow performance and include an innovative aluminum structure for low noise and long-term reliability.

Each housing is made of high-endurance metal and the innovative impeller design improves air pressure in low wind volume environments resulting in low power consumption and high efficiency.

The fans can operate from -20°C to 80°C and also include a two-speed motor and a special mounting base designed for easy installation.

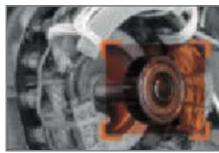

Two-speed motor

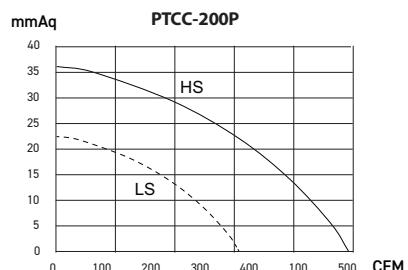

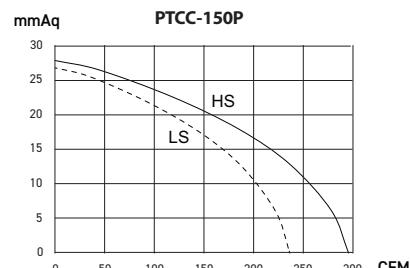

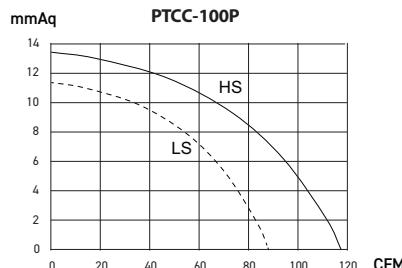

Advanced multi-blade design ensures high airflow, high pressure, low noise, and good dynamic balance to grade G2.5

Easy to install mounting base

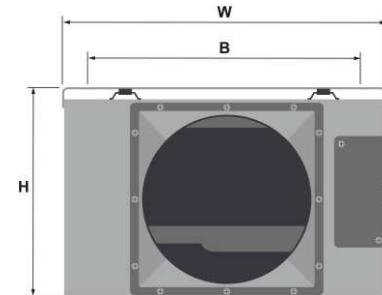

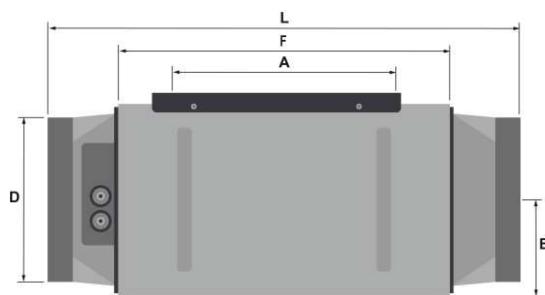

Dual ball bearings for long-life operation

HS: High Speed
LS: Low Speed
